As a designer, I have a special passion for patterns, textures, and cutting. In this design, I focused on the texture to make the pattern look better. To begin with, I saw this pattern in a pattern book where it looked rather dull materialized in a cotton. Changing the material can do everything for your work - it can make it lighter, brighter, softer, harder and so many more things can come out of working in different yarns. Changing the yarn - working the pattern in strands of raw silk and super kid mohair which are both lightweight yarns using a big size crochet hook you will now find a fluffy, warm and interesting texture, where the beauty of the yarn and the pattern in a union makes you happy when you look at it.

Yarn: DesignEtte Hokkaido, 100% raw silk, (approx. 250m per 50g) Spun and dyed in Japan.
